

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	3rd October 2026
Team ID	SWTID-2026-3114
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	High Impact Field Control	Trigger UI Policy when Impact is set to HighControl Incident fields based on Impact condition
FR-2	Automatic Urgency Management	Automatically set Urgency to High when Impact is HighMake Urgency read-only for High Impact Incidents
FR-3	Incident Validation	Validate Assigned To before saving a High Impact IncidentDisplay an error message when Assigned To is empty
FR-4	State Change Restriction	Prevent State changes through direct list editingDisplay a warning message when list editing is attempted
FR-5	Condition Reversal	Reverse UI Policy field changes when Impact is changed from High to another value
FR-6	Incident Update & Save	Allow valid Incident updates through the formPrevent saving when required validation conditions are not satisfied

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	The solution should provide clear field behavior, validation messages, and user feedback to make Incident management easy to understand.
NFR-2	Security	The solution should prevent unauthorized or unintended State changes through direct list editing.
NFR-3	Reliability	Client Scripts and UI Policies should consistently apply the configured rules whenever the specified Incident conditions occur.
NFR-4	Performance	Field updates and validations should execute immediately on the Incident form without unnecessary delay.
NFR-5	Availability	The configured Client Scripts and UI Policies should be available whenever users access and manage Incident records.
NFR-6	Maintainability	The configuration should be clearly defined and easy for ServiceNow administrators to understand, test, and modify when required.
