

Project Design Phase

Problem – Solution Fit Template

Date	3rd October 2026
Team ID	SWTID-2026-3114
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Problem – Solution Fit Template:

Template:

1. CUSTOMER SEGMENT(S) Who is your customer? i.e. working parents of 0-6 y.a. kids ServiceNow Incident users and ServiceNow administrators who create, update, validate and manage Incident records.	6. CUSTOMER CONSTRAINTS What constraints prevent your customers from taking action or limit their choices of solutions? i.e. spending power, budget, no cash, network connection, available devices. • Users may forget required information. • Manual field updates can cause errors. • Users may accidentally modify Incident State. • Solution should work within the existing ServiceNow Incident form.	5. AVAILABLE SOLUTIONS Which solutions are available to the customers when they face the problem or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? i.e. pen and paper is an alternative to digital notetaking • Manual field validation. • Manual Urgency updates. • User training. • ServiceNow Client Scripts and UI Policies for automatic control.
2. JOBS-TO-BE-DONE / PROBLEMS What jobs to be done (or problems) do you address for your customers? There are more than one, explore different slides. • Create accurate Incident records. • Update Incident fields correctly. • Ensure High Impact Incidents are properly assigned. • Prevent incorrect State changes.	9. PROBLEM ROOT CAUSE What is the real reason that this problem exists? What is the back story behind need to do the job? i.e. customers have to do it because of the change in regulations. The standard Incident form does not automatically provide all the required field controls and validations for the project's process conditions.	7. BEHAVIOUR What does your customer do to address the problem and get the job done? i.e. directly related, find right color notebook installer, evaluate usage and benefits, indirectly associated associates spend time from on volunteering with (i.e. Greenpeace) Users create and update Incidents through the ServiceNow form. They select Impact, enter assignment details, save records and may update Incidents from the list view.
3. TRIGGERS • Impact is changed to High. • User attempts to save a High Impact Incident without Assigned To. • User tries to edit State directly from the Incident list. 4. EMOTIONS: BEFORE / AFTER Before: Concern about incomplete or incorrect Incident information. After: More confidence because the system automatically controls and validates the fields.	10. YOUR SOLUTION Implement Client Scripts and UI Policies to dynamically control Incident fields, automatically set Urgency for High Impact Incidents, validate Assigned To before saving, and prevent State changes through direct list editing.	8. CHANNELS of BEHAVIOUR 8.1 Online: ServiceNow Incident Form and Incident List. User interaction: Field selection, form submission and list editing.
